

ENVIRONMENTAL MANAGEMENT SYSTEMS

The P-E Handley-Walker Approach

Does your business need an Environmental Management System? (EMS)

Are you required to comply with **environmental laws and regulations**?
 Do you consider you may be at **risk of non-compliance**?
 Are you looking for ways to improve your **environmental performance**?

If you answered YES to one or more of the above questions, an EMS can help your organization

You will already have some of the elements of an **EMS** in place, and some of the tools to establish it, if you have implemented a **quality management system and/or an occupational health and safety management system**

Some Common Aspects of Quality and Environmental Management Systems

<p style="text-align: center;">QMS</p> <ul style="list-style-type: none"> • Quality Policy • Adequate Resources • Responsibilities and Authorities • Training • System Documentation • Process Controls • Document Control • System Audits • Management Review 		<p style="text-align: center;">EMS</p> <ul style="list-style-type: none"> • Environmental Policy • Adequate Resources • Responsibilities and Authorities • Training • System Documentation • Operational Controls • Document Control • System Audits • Management Review
--	---	--

Whether or not you have compliance management systems in place, **P-E Handley-Walker** can help you to establish effective control of environmental management, focussing on the areas of greatest risk for your business.

POTENTIAL BENEFITS

<p>Better environmental performance Confidence that you comply New customers / markets</p>	<p>Prevention of pollution/resource conservation Increased efficiency / reduced costs Better public image - investors, regulators</p>
